

Georgia Department of Public Health Certificate of Immunization

All students must be current with their immunizations, and records must be up to date with the student's doctor.

Georgia Resident Students

The school obtains student immunization records (Form 3231 Certificate of Immunization) through the Georgia Registry of Immunization Transactions and Services (GRITS). If your child has immunization records on file with a participating Georgia physician, then no additional paperwork is required.

Non-Georgia Resident Students

Students that are not residents of Georgia at the time of enrollment must produce a physician-produced compliant certificate of immunization record prior to the student's first day of class.
