MAGNIFY THE LORD

September 09, 2022

Dear SMA Families,

September 12th begins the first official week of after school robotics at SMA! This program involves all students from grades PK all the way to 12th grade. To learn more about the program please watch the video here: <https://youtu.be/2-klf7QDcLO>.

To sign your student up for the program, please complete the sign-up form at: <https://tinyurl.com/smaroboticssignup>

Practices will take place in room 118 in the Upper School. Students in the lower school grades (PK-8th) will be picked up from the PK-8 office at the end of the school day and walked to room 118 in the upper school. All students are expected to be picked up immediately at the end of the robotics program at the second set of double doors facing the parking lot. These double doors have a crosswalk that extends to the parking lot. Please note these doors will be locked and we will meet you outside of them with your child. If you have a Pk-8 student and you are late picking your child up, then the student will be taken to the Extended Care Program (ECP fees apply). You will then need to pick your child through the PK-8 school. High school students who are not picked up on time may jeopardize their participation in the program.

If you have any questions or want to help, please email STEM@smaschool.org.

Please note next Friday, September 16th, is an early release day and we will not meet for Robotics. Flyers will be coming home in your child's Thursday folders if you have a Pk-8th grader. The first robotics meeting for PK-3 students will take place on Friday, September 23rd.

Thank you. We look forward to working with your students!
